

Ministry of
the Interior and Safety

On 14:00, May 16 (Tuesday) National Civil Defense Exercise to take place for 20 minutes!

Training raid alert issued on 14:00 - Evacuation of residents and traffic control

Residents must **evacuate to nearby shelters** for
15 minutes starting from 14:00

Receive training or listen to the radio broadcast
(MHz) at the shelter

Drivers must park their cars on **the right side of the
road** following instructions of traffic control agents
And **listen to the radio broadcast** (MHz)!

Residents and vehicles can resume moving while
maintaining their guard
After the **Guard Alarm is issued on 14:15**

**Daily routines can return to normal after
the Guard Alarm is lifted on 14:20**

Caution during Emergency

Make thorough preparations during your daily lives

Identify the closest Civil Defense Shelter

On the smartphone app, “Emergency Ready App,” go to “Find Shelters → Civil Defense Shelter”

Prepare Emergency Supplies for emergencies

- ✓ Food, drinking water, first aid medication, radio, flashlight, match, candle, bedding, clothing,
- ✓ Chemical Attack Response: Gas mask, medical mask, rain coat, glove, soap
- ✓ Children (name tag), adults (ID or copy of ID)

Meaning of Civil Defense Alarm

- When enemy attack is expected: Guard Alert (Announcement: Flat siren for 1 minute)
- When enemy attack is near or is in progress: Raid Alert (Announcement: Waving siren for 3 minutes)
- When chemical attack is confirmed or in progress: Chemical Alert (Announcement: Vocal announcement)
- When enemy attack stopped and additional attack is no longer anticipated: Alert Lifted (Announcement: Vocal announcement)

Evacuate to safety when a raid alert is issued or enemy attack lands

- When a raid alert is issued, individuals in apartment or high-rising buildings must evacuate using the emergency stairs rather than the elevator
Drivers should park their cars on the right side of the road and evacuate
- When a chemical attack is in progress, protect one's respiratory organs and evacuate to rooms on higher levels
- When a bio-chemical attack is in progress, protect one's respiratory organs using a mask and evacuate to indoor environments
- Evacuate to interiors of concrete buildings or underground to avoid radioactive substances and its fallout (with rain coat or umbrella)

Listen carefully when the attack stops and silence prevails

- Listen to radio broadcast and follow instructions provided by the government
- Try not to panic at rumors or false information
- Stay together with family and neighbors

Active participate will protect you!
